

## The Conservation Committee asks you to Please Act Now

**The headwaters of streams throughout our state are being destroyed by uncontrolled suction dredging for gold. This is tearing up salmon & trout redds, and leaving any returning fish nowhere to spawn**

The WA Senate has passed **SB 5322** “Ensuring compliance with the federal clean water act by prohibiting certain discharges into waters of the state.”

Where is **SB 5322 – 2019-20** in the Legislative Process?

**With the SB 5322 on the floor for voting it is the time to act to protect our fish and by making some noise. Take a few moments to call or email your state legislator and tell them you support SB 5322. Taking the time to contact your legislator directly is important and effective.**

**Thanks –  
Conservation**
